# Substance Abuse Treatment

[crawfordmentalhealth.org](http://crawfordmentalhealth.org)

## Substance Abuse Services

Services are planned with the individual's personal needs as the primary focus for treatment.

## Intermediate Treatment –ATC

Intermediate Treatment provides a regimen of structured services in a 24-hour residential setting. They are housed in our Addiction Treatment Center where they can reside safely. For the typical resident in an intermediate treatment program, the effects of the substance abuse on the individual's life are so significant, and the resulting level of impairment so great, that a less intensive modality of treatment is not feasible or effective. This program consists of individual, group, and/or family counseling, life skills, recreational groups, and self-help support meetings. They receive 40 hours of structured activity to include individual and group recovery skills and relapse prevention.

## Outpatient Treatment

Outpatient Treatment is designed to help individuals achieve changes in their substance abuse behaviors. Treatment shall address an individual's major lifestyle, attitudinal and behavioral problems that have the potential to undermine the goals of treatment. This program consists of group, individual and/or family counseling.

## Intensive Outpatient Treatment

Intensive Outpatient is provided any time during the day or week and provides education and counseling services while allowing the individual to apply their newly acquired skills outside of treatment. Programs may provide overnight housing for individuals who have problems related to transportation or family environment but who do not need the supervision or 24-hour access afforded by a residential program.

## Social Detox

Social Detox is typically short term (less than 7 days) and provides 24-hour supervision, observation and support for individuals who are intoxicated or experiencing withdrawal from other drugs. This program provides services for those individuals whose intoxication/withdrawal signs and symptoms are sufficiently severe enough to require 24-hour structure and support. This program does not include medical detoxification.

## Women's & Children Reintegration

Reintegration provides 24-hour residential living of a supportive nature for recovering alcoholics and/or drug dependent women and their children. Residents benefit from a structured program of individual and group counseling, recreational and social activities, milieu therapy and case management services. Reintegration treatment assists women and their children in crossing the bridge of treatment back to the community, once stabilized in their recovery.
